

for Magnetic Resonance Imaging (MRI) exams

EN

Dear patient

Magnetic Resonance Imaging (MRI) uses a strong magnetic field which can interfere with metallic objects and electronic devices. It is therefore important to NOT bring metallic objects into the scanner area. Electronically controlled devices or chip cards (e.g. credit cards) can be damaged or destroyed.

Please answer the following questions by placing a mark. Please do not hesitate to ask your technologist if you have any questions and confirm that you have read and understood all questions by signing this form.

Attention!

Before you enter the MRI examination room you have to remove: Watches, adornments, purse or wallet plus coins, hearing devices, glasses, credit cards, dental prosthesis, hairpins or hairpieces.

Credit cards and similar cards with magnetic strips will be erased when entering the examination room due to the strong magnetic field. For further details please ask the MRI personnel.
